OBJECTIVE

Enthusiastic Computer Science Engineering student with skills in Python, Frontend Development, and Full Stack technologies. Seeking an entry-Level role as a Python / Frontend / Full Stack Developer to build scalable web applications and contribute to innovative software solutions while continuously enhancing my technical expertise.

TECHNICAL SKILLS:

- **Programming Languages :** Python, JavaScript, C, C++, PHP
- **Backend :** Python(Flask), REST APIs
- **Frontend :** React.js, HTML, CSS, Bootstrap
- **Database :** SQL/MySQL
- **Tools :** Git, GitHub, VS Code, Jupyter Notebook, Render (Cloud Deployment)
- **Libraries & Framework :** Flask, QR Code Libraries, Pandas, NumPy
- **Core Concepts:**OOPS, CRUD Operations, Authentication & Authorization, API Integration, Responsive Web Design
- **Softskill :** Problem-solving, Adaptability, Quick Learner

EDUCATION:

- **B.TECH in Computer Science and Engineering** **2026**
  K D K Collage of Engineering, Nagpur.
- **Diploma in Computer Engineering** **2023**
  Government Polytechnic, Jalgaon.
- **Class X** **2019**
  G S Chudhari Secondary School, Varangaon.

INTERNSHIP:

Frontend Developer Intern
Athenura Pvt. Ltd | February 2026 – Pursuing

- Developed responsive web pages using HTML, CSS, JavaScript and React js
- Improved UI design and user experience for web applications.
- Collaborated with backend team for API integration and testing.

Python Developer Intern
Codesoft | February 2024 –March 2024
Codec Technologies | November 2025 - December 2025

- Worked on Python-based projects and improved problem-solving skills.
- Developed small backend modules and implemented basic automation scripts.
- Gained hands-on experience in core Python programming concepts.

PROJECTS:

Dynamic QR-Based Attendance System (Final year project)
Tech Stack: Python, Flask, MySQL, HTML/CSS, QR Libraries, Render.

- **Developed** a web-based, contactless attendance system using **Flask** that generates **dynamic QR codes** refreshing every 10 seconds to eliminate proxy attendance.
- **Implemented** role-based authentication for teachers and students, supporting session-specific QR generation and mobile-compatible scanning.
- **Engineered** a secure session-token mechanism with a 15-minute expiry and automated timestamps to ensure data integrity.
- **Deployed** on a cloud platform (Render), achieving a 60–90% reduction in attendance processing time compared to manual methods.

Blood Bank Management System(Diploma project)
Tech Stack: PHP, MySQL, HTML, CSS.

- **Developed** a comprehensive management system to streamline the tracking and distribution of blood units across medical facilities.
- **Designed** and managed a **MySQL** database to store donor records and real-time inventory levels, ensuring high data integrity.
- **Created** a user-friendly interface to improve the accessibility of critical information for medical administrators.

Heart Disease Prediction System
Tech Stack: Python, Pandas, NumPy, Scikit-learn

- Developed a machine learning model to predict heart disease.
- Performed data preprocessing and applied classification algorithms for accurate prediction

CERTIFICATIONS AND TRANNING:

- C and C++ Programming – Info Planet
- Full Stack Development in Python – Skillected Pvt. Ltd.
- **Industrial Training | Sumago Infotech Pvt. Ltd.** (Aug 2021 – Sep 2021)
